MISSISSIPPI

ANNUAL REPORT
of the
STATE SUPERINTENDENT
OF PUBLIC EDUCATION
to the
Legislature of Mississippi
1987

STATISTICAL REPORTS

1985-86

State Department of Education
Jackson, Mississippi

Richard A. Boyd, Ed.D.
State Superintendent

MISSISSIPPI

STATE DEPARTMENT OF EDUCATION

Richard A. Boyd, Ed.D., State Superintendent of Education
Suite 501 Sillers Office Building • P.O. Box 771 • Jackson, Mississippi 39205-0771 • (601) 359-3513

January 5, 1987

To the Legislature of the State of Mississippi:

In accordance with the requirements of Section 37-3-11 of the Mississippi Code of 1972, Annotated, I am pleased to submit to you the annual report of the Superintendent of Public Education for the fiscal year 1985-86.

The 1985-86 school year once again saw progress in the state school system. Pilot kindergarten classes were established in 108 of the state's 154 school districts, and achievement tests which were administered at the beginning of the school year and again at the close of the year showed substantial gains in learning. That bodes well for the progress that we can hope to see as kindergartens become universal in the 1986-87 school year.

The new school accreditation system was piloted in 16 local school districts in an attempt to make it as effective as possible before putting it into place in the 1986-87 school year. Continued refinement needs to be done for it to be all that we want it to be, and we are working closely with this year's accreditation site-visit systems to improve the system.

The 1985-86 school year saw the completion of the first group of Mississippi students to have the benefits of three full years of the Assistant Teacher program -- and the results were remarkable! In comparing the achievement of those third-grade students with their counterparts of the previous year -- who went through their first three years of school with **no** assistant teachers -- there was a significant difference in favor of the 1985-86 third graders.

The 1986 senior class of Mississippi high schools compiled the highest American College Testing (ACT) college entrance examination scores in 12 years. In fact, their average scores in English and in the Natural Sciences were the highest in Mississippi history.

It has been evident to some that the 1986-87 school year would be the most difficult that the Mississippi Department of Education and local school districts would face because this is the year in which nearly every component of the Education Reform Act would finally go into place. I look forward to reporting to you at this time next year as to how we fared during that year.

Sincerely,

Richard A. Boyd, Ed.D.
State Superintendent of Education

STATE BOARD OF EDUCATION
1987 LEGISLATIVE RECOMMENDATIONS

The State Board of Education has identified **five** of the recommendations as top priorities for legislative attention. The Board feels if these five receive immediate action, the reform movement will be greatly enhanced. The other twenty-one recommendations are not listed in any particular order of importance.

1. **A Management Information System for the State Department of Education**
2. **Increase in Compulsory Attendance Age to 16**
3. **Majority Vote on Bond Issues**
4. **Kindergarten Under the Minimum Program**
5. **Appointment of All Local School Superintendents**

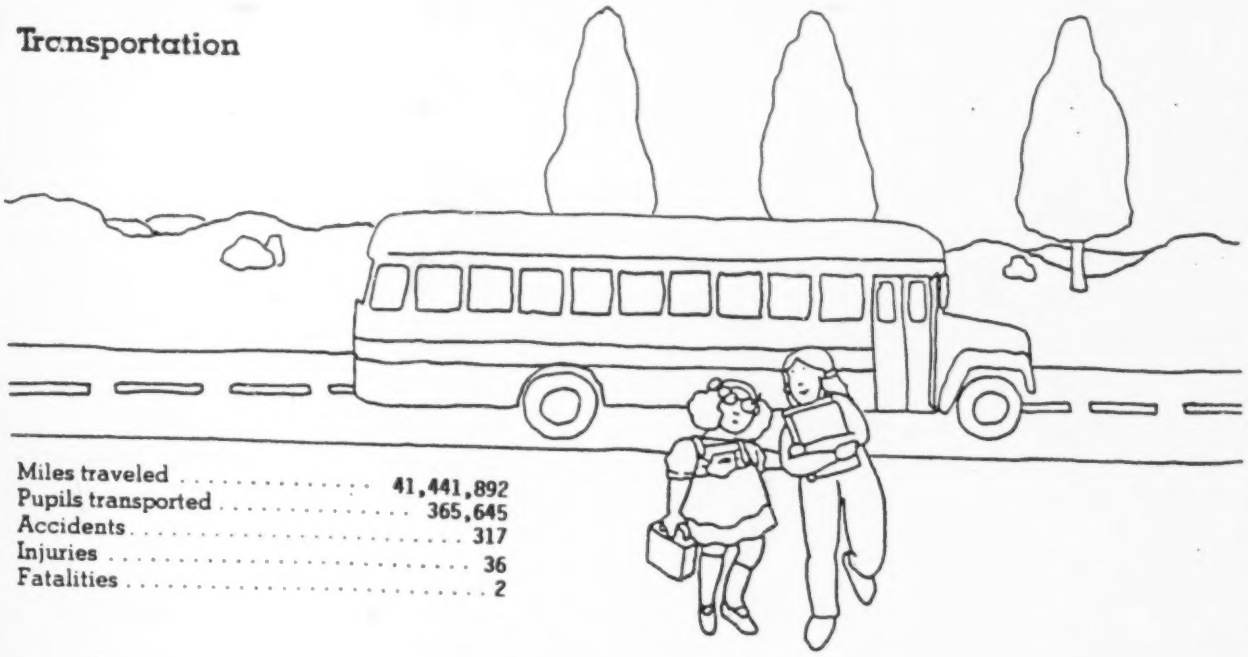
* Salary Increase for State Employees
* A Concept of Equal Funding Per Pupil
* Additional Professionals for the State Department of Education
* A Consolidated Budget for the State Department of Education
* An Increase in Teacher Aide Base Salary
* Additional Funding for Textbooks
* Increase in Supportive Services
* State Funding for Remediation Programs
* Deletion of School Closing Sections
* Additional Funding for an Increase in Adult Education
* A Grant Program for Education Majors
* Continuation of the Reversal Procedures on School Bond Referendums
* Continuation of Sovereign Immunity
* Home Rule for School Districts
* Additional Funding for Transportation
* Restoration of the State Allotment to School Districts for Administration
* Local District Option on Vocational-Agriculture Program
* State Health Insurance Plan for Certificated Personnel
* Required Orientation Program for new Local School Board Members
* Technical Changes:
  a. Various changes in the Uniform School Law
  b. Amend Section 37-15-9 to allow certain four-year-olds to attend kindergarten
  c. Repeal Section 37-3-25 which was left in the law after the Vocational Division was moved under the SDE
  d. Clarification in the law to authorize counties to distribute TVA in lieu monies to school districts

ADMINISTRATION AND FINANCE
N. F. Smith, Director
359-3525

The Bureau of Administration and Finance is composed of multiple divisions. The Division of Fiscal Management and Administrative Services exercises financial control of all education funds, totaling 917.1 million dollars, and provides technical assistance for financial management to all recipients. The Print Shop and Mail Services are also an important part of this division. The Division of School Building and Transportation provides services to school districts in building construction and renovation as well as the transportation of students and driver safety education. The Division of Child Nutrition Programs provides services to all school food programs and non-school food programs in the State. The Division of Personnel Services provides services to all Department employees in personnel procedures and payroll.

The Division of School Building and Transportation has effectively administered the state transportation program. Records show that 5,611 school buses transported 365,645 pupils to and from schools each day with an additional 3,700 special education students and 11,618 vocational students to vocational centers. The total annual miles traveled with two fatalities was 41,441,892. Training for regular and substitute bus drivers was provided to 10,000 persons. Driver education training was provided to 25,052 students with 11,321 of these being trained in the simulator program. Six school districts completed and filed applications to receive Federal Asbestos Funds. Five districts were awarded funds in the total amount of $2,237,434.93. Thirty-one local school districts received $2,943,111.30 in Federal Impact Aid Funds through the assistance of this office.

Transportation

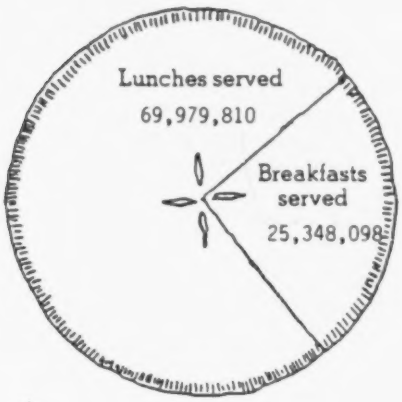


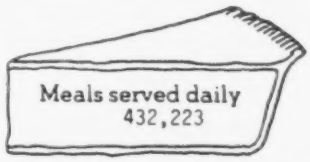
Miles traveled	41,441,892
Pupils transported	365,645
Accidents	317
Injuries	36
Fatalities	2

The Division of Child Nutrition Programs has effectively administered a food service program for 154 school districts which comprise 912 schools and 199 non-school food service programs. Students were provided 85.1 million meals and 20.2 million meals were provided to non-school programs. A training program in all phases of child nutrition was provided to 4,438 food service staff. School and non-school programs were reimbursed 90 million dollars with 17.3 million dollars in USDA donated foods provided to the schools and charitable institutions.

The Division of Personnel coordinates and supervises the training of staff in the job performance evaluation process. This Division formulates and administers policies and procedures, rules and regulations for all areas of personnel management.

Food Service





ASSESSMENT AND COMPLIANCE

Sarah Beard, Director
359-3486

The Bureau of Assessment and Compliance is composed of two major divisions which have varied responsiblities. The Division of Accreditation has begun the implementation of the Performance Based Accreditation System which is designed to monitor all provisions of the Education Reform Act of 1982. Twenty-eight school districts are scheduled for site visits for the school year 1986-87. In preparation for the site visits, the Division has trained 285 people as evaluators. Each school district scheduled for a site visit has been sent two publications: A Site Visit Preparation Checklist and Preparing for Accreditation Site Visits. These documents explain site visit procedures, including the role and responsibilities of the Auditor (SDE Staff) in charge, the evaluators, and local district personnel. When the site visit is completed, data collected on site is returned to the SDE by the auditor in charge. Information is collected on scannable answer documents which are scanned, and a report of the findings is sent to the school district and is used by the district to develop its five-year plan based on those findings.

The Statewide Testing Branch of the Division of Testing and Information Management has two major components: the Basic Skills/Functional Literacy which tests students in grades 3, 5, 8 and 11; and the norm-reference which tests students in grades K, 1, 4 and 6*. Approximately 132,000 students were tested in 1985 using the Mississippi Basic Skills/Functional Literacy Test. Districts received individual score reports for each student on each skill tested. Other reports gave additional information on a district wide basis. These districts reports can be used to give some indication of how well a district is accomplishing its academic goals.

The data received from the norm-reference testing component is used to evaluate the effectiveness of the Kindergarten and Assistant Teacher Program. These data demonstrate that both programs are very successful.

Distribution and testing dates have been established through 1990. This will allow school districts to plan their schedules accordingly.

The Management Information Branch is in the process of developing and implementing a five-year plan. Hardware and software have been purchased and placed in each Bureau. Individuals have been trained in word processing and dBase III. This has been accomplished in cooperation with the Bureau of Vocational Education.

Plans are currently underway to establish a relational data base which can be used to store and retrieve all local school district data. An online teacher certification system to automate the issuance and renewal process of teacher and administrator certificates will be used in early 1987. An internal networking system is in the developmental stage as are several other projects.

*These grades different slightly from those tested in 1986.

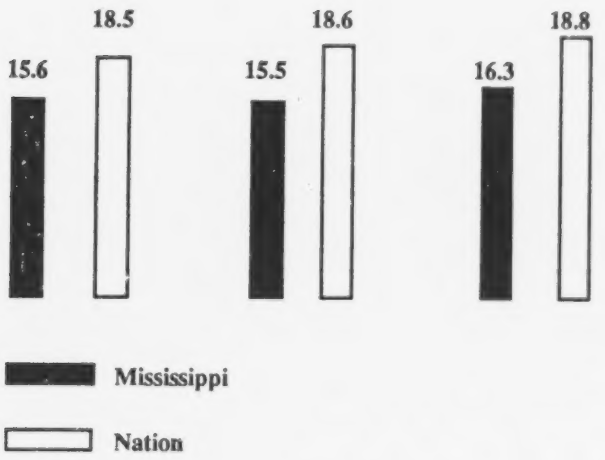
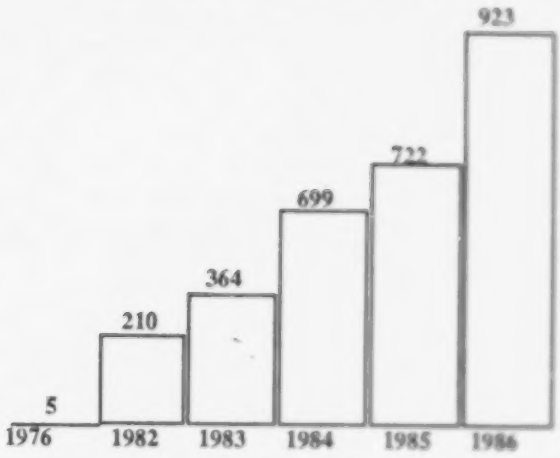
ACT Scores



Advanced Placement Participation



BUDGET
Judy Rhodes, Director
359-2038

The overall mission of the Bureau of Budget is to develop and maintain an annual budget for the State Department of Education which reflects the educational priorities as established by the State Board of Education and the State Superintendent. In carrying out this mission, the Bureau of Budget must provide accurate and timely information in regard to budget matters to the State Fiscal Management Board and the Legislative Budget Office, as well as to other bureaus within the Department. The Bureau of Budget must also develop and maintain internal policies and procedures to assure proper implementation and control of all SDE budgets.

During the past year, the following major tasks have been accomplished:

Development of the Fiscal Year 1988 SDE budget to include extensive internal review and adjustment prior to submission.

Implementation of an indirect cost plan for the SDE.

Development of procedures for the SDE to improve budget and program management.

EXTERNAL RELATIONS
Andy Mullins, Director
359-3515

The Bureau of External Relations is responsible for internal and external communications, media relations, publications, photography, public service announcements, and marketing for the Department. Bureau staff members serve as liaisons to the Legislature, other state agencies, educational and civic organizations and the general public. The bureau coordinates a number of special projects for the agency, such as Teacher of the Year, the Elementary and Secondary School Recognition Programs, and the monthly State Board Recognition Program.

Bureau highlights for the past year include the continuation of the close working relationship with both chambers of the Mississippi Legislature. One of the most significant aspects of this is presenting the State Board of Education's legislative recommendations. The Board's legislative program is coordinated through this office and staff members regularly attend sessions of the House and Senate. For the second year, this office produced and distributed a brochure highlighting the Board's legislative recommendations.

This office served as the staff liaison to the Advisory Committee on Participation in Extra-Curricular Activities. It is also working with the Special Study Committee for Equity Funding.

External Relations has begun a monthly newspaper, Mississippi Messages, which includes news and features about public education in the state. Printed during the school year, the newspaper is distributed to schools, legislators, the media and the general public.

Finally, recognition of outstanding achievement is another area of which the bureau is proud. At each meeting of the State Board of Education, teachers, students, administrators, schools and/or school districts are honored for their performance. These, along with other outstanding achievers are mentioned on another page in this report.

PLANNING AND POLICY
Dr. Ron Love, Director
359-3598

The Bureau of Planning and Policy is responsible for the State Department of Education's Five-Year Plan, Chapter 2, grants, research and development of short and long-range planning. Also, the Division of Program Development is housed in the Bureau of Planning and Policy. Responsibilities of this division include continued development and refinement of school improvement programs such as performance-based accreditation, testing, personnel appraisal and the state curriculum structure.

Highlights include developing the Department's first Five-Year Plan for Education in Mississippi. This document, which will be updated annually, includes the Department's goals and recommendations for the public school systems in Mississippi.

Continued development and field testing of personnel appraisal instruments and training materials for administrators, guidance counselors, speech/hearing clinicians, librarians, and school psychologists/psychometrists is coordinated by the bureau.

Refinement of the State Curriculum Structure, the Basic Skills Assessment Program and the Performance-based School Accreditation System is being done through Planning and Policy. This involves conducting pilot research projects as well as coordinating efforts with institutions of higher learning, local school district personnel, interested professional organizations and the public. Advisory committees exist for each of these projects and provide valuable assistance in reaching bureau goals.

This bureau developed a proposal for a dropout prevention model program which was submitted to the Department of Health and Human Services for funding in FY 1987.

The Bureau established a method to work with other agencies to develop joint-funded programs for education to maximize efficient use of federal and state funds. A clearinghouse for information on grants and private foundations which have funds available for educational programs has also been established.

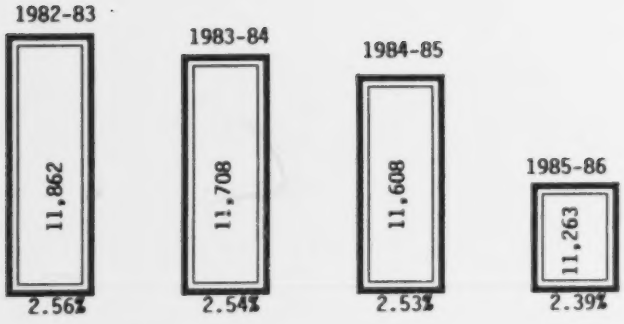
The Bureau developed a $330,000 model for dropout prevention, funded through the Job Training Partnership Act (JTPA), which is being tested at four local school districts.

The Bureau established, for the first time, through Chapter 2 administrative funds, a sum of $50,000 set aside for exemplary programs. Selection of the four program operators through a competition proposal process was determined by the State Advisory Council for Chapter 2.

The Bureau is coordinating a Health Curriculum Committee which will present recommendations for a new Health Curriculum in the summer of 1987.

The Bureau has received a grant from the National Council of State Legislatures to revise the school finance plan. This grant is being used to provide information on finance reform to the State Legislature.

Dropouts



SCHOOL IMPROVEMENT
Dr. Ralph Brewer, Director
359-3768

The Bureau of School Improvement emphasizes, through its two major divisions, direct service to school districts.

The Staff Development Division which includes the Executive Management Institute annually develops and delivers training programs for approximately 2,000 school administrators. In 1986, training focused on developing personnel evaluation skills. More than 100 training sessions lasting from four to five days were held. An additional 30 training programs provided training in use of evaluation instruments for administrators, guidance counselors, speech pathologists, audiologists, librarians, school psychologists, and psychometrists.

In addition, this division conducted 48 seminars to update administrators about the status of the Education Reform Act's programs. A two-day Superintendent's Conference featured state and national education leaders and three, four-day sessions concentrated on developing leadership skills and "effective schools" knowledge for approximately 100 new administrators.

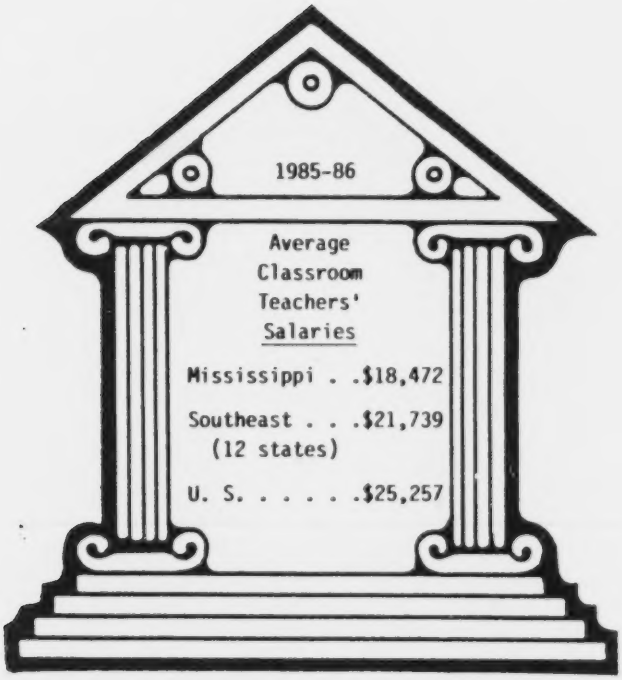
Training modules to be used in 1987, were developed. They cover instructional management skills, effective staff development practices, and computer applications skills as related to administrative responsibilities.

The Program Implementation Division helps school districts institutionalize programs developed in response to policies of the State Board of Education. During the past year new programs were (1) kindergarten; (2) personnel evaluation; (3) a state-wide curriculum structure; (4) performance-based accreditation; and (5) revised teacher certification requirements. In all five instances, the program assistance to school districts included printing the program requirements in document form and distributing them to school districts. Planning and executing initial technical assistance to districts during the implementation phase was accomplished.

A curriculum unit was created to assist in the implementation of the Curriculum Structure and the 1986 Instructional Management law as well as other requirements of an effective instructional program.

In order to provide direct service to each school district, five regional service officer positions were created. Each service officer is assigned to approximately 30 school districts for the express purpose of assisting in local school improvement efforts and providing an immediate link with the resources of the State Department of Education.

Ongoing programs within the Bureau include teacher certification, staff development, and the Mississippi Reading Improvement Program. During the past year major accomplishments in these programs were: (1) the continuing development of the provisional teacher certification program which is currently in effect at state teacher training institutions and which will be in effect in 1988 in school districts; (2) the evaluation of staff development plans from all public school districts and state accreditated non-public schools; and (3) the revision and adoption of guidelines for the Mississippi Reading Improvement Program.



SPECIAL SERVICES
Dr. Walter Moore, Director
359-3498

The Bureau of Special Services is divided into five divisions, four of which are responsible for assessment and programming for exceptional students. These four divisions are: Exceptional Student Programs, Exceptional Student Assessment and Special Projects, and Exceptional Student Learning Resource Centers A and B. The fifth division, Instructional Alternatives, is responsible for administering the following federal grants: JTPA Dropout Prevention, Chapter 1 Migrant, Neglected and Delinquent, National Diffusion Network, Education for Economic Security, Bilingual, National Origin, Immigrant, Refugee and Race Desegregation.

The Bureau has also been assigned the responsiblity for working with the Alternative Education Committee to develop a comprehensive plan for alternative education in the state. The Committee is recommending that a process be implemented which will insure that a continuum of educational services is available for all students.

The nonduplicated child count of handicapped students for 1985-86 was 51,929; there were approximately 13,000 gifted/talented students serviced in 124 school districts. There was a total of 3,789 teachers assigned to serve these students; this included 456 teachers of gifted/talented students. During the 1985-86 session, there were approximately 105,000 Chapter 1 students served by 1,377 Chapter 1 funded teachers and 1,445 Chapter 1 funded teacher aides. Most direct services provided to Chapter 1 students were in the areas of reading, language arts, or mathematics.

More than 36,000 students were determined to be eligible/ineligible by Screening Teams; of that number, the Exceptional Student Learning Resource Center staff completed 25,700 of them. The assessment capabilities of people involved in the assessment process continue to improve resulting in improved quality of assessment data used to determine eligibility and program placement for handicapped and gifted/talented students. Under the direction of Bureau staff, software which produces a computerized Assessment Team Report was completed and distributed to local school district personnel. It is estimated conservatively that this software will save personnel two hours in the development of the Assessment Team Report for each handicapped student.

VOCATIONAL-TECHNICAL EDUCATION

Elwyn Wheat, Director
359-3088

The Bureau of Vocational-Technical Education has four major divisions. Program Operations is responsible for supervision and technical assistance for ongoing vocational programs in Agriculture, Business Education, Marketing and Cooperative Education, Health Occupations, Home Economics, Industrial Arts, and Trade and Engineering Technology. Ongoing vocational programs are programs that are provided to post-secondary and secondary students on a continuous basis.

The Supportive Services Division is responsible for supervision and technical assistance in Vocational Guidance, Adult Basic Education, Remedial Programs, Staff Development, Sex Equity, Office of Civil Rights Compliance and Coordination of Teacher Education Activities.

The Resource Management and Coordination Division is responsible for processing and technical assistance for Equipment Purchase, Inventory and Transfer, Performance Review, Planning, Certification, Construction and overall Resource Management.

The Industrial Services Division is responsible for supervision and technical assistance in the area of contracted federal programs (JTPA), the specific Industrial Training and Adult Vocational Programs. This division is responsible for short-term and/or temporary vocational programs.

In elaborating on the Industrial Services Division in reference to the Start-up Training service area, Vocational Education is being provided through all public secondary schools and junior colleges in Mississippi. Also, through these public schools a Start-up Training Program is being offered to help new industries in expanding their labor force and operation. This particular phase of Vocational Education is doing much to encourage industries to locate in Mississippi. The Governor of Mississippi has been quoted as saying that during his years in office 50,000 jobs have been created for business and industry. During that time Vocational Education trained 37,000 of the 50,000 people through the Industrial Start-up Training Program.

Strategic Plan

Vocational Education for the past year has been implementing the Strategic Plan to its fullest extent toward Basic Vocational Programs and Diversified Technology Programs, more occupational offerings at the secondary level and more technical offerings at the postsecondary level. Computer equipment has been purchased for 198 vocational Basic Skills Programs and upgrade training has been provided to 200 Vocational personnel in its utilization. The equipment will be utilized in implementing the Vocational Basic Skill Program curriculum.

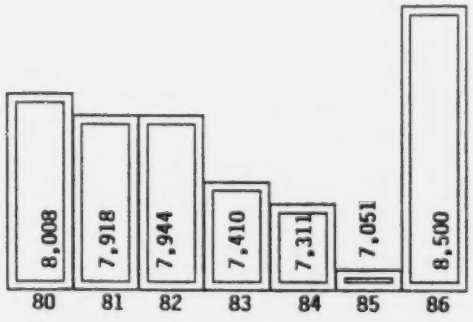
For the Diversified Technology Program, Vocational Education has purchased equipment to implement 11 new Diversified Technology Programs and to convert five pilot Principles of Technology Programs to Diversified Technology for a total of 16 programs equipped to use the Diversified Technology curriculum. Intensive training was scheduled for 16 instructors in the utilization of the equipment. The first-year curriculum has been developed for the Diversified Technology Programs.

Vocational Education training workshops were held in various locations across the state by the different service areas. The main thrust of the workshops was focused on the Industrial Arts, Home Economics and Agriculture teachers. These are the areas that were heavily involved with the Basic Skills Program.

Carl Perkins Act of 1984

The Vocational Bureau on July 1, 1985, came under a new federal law which replaced the Vocational Education Act of 1963. The prime intent of this new Act is to make Vocational Education programs accessible to all persons, including handicapped and disadvantaged persons, single parents and homemakers, adults in need of training and retraining, persons participating in programs designed to eliminate sex bias and stereotyping in Vocational Education, and incarcerated persons, and to encourage program improvement and expansion. New programs have been implemented for single parent and sex equity through Request for Proposal (RFP). A new distribution formula has been implemented for the disadvantaged and handicapped funds made available through the act to be provided to each eligible recipient. Special project agreements were developed in order to give each eligible recipient an opportunity to receive special funding for the project for their school and/or school district.

GED Certificates Issued from 1980-86



Mississippi's Outstanding Achievers in 1986

American Industrial Arts Student Association
1st Place, Research Paper Event
Kenna Young, Threadgill Jr. High School, Greenwood

Definition: A school is a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.

SCHOOL ACCREDITATION
1985-86

The term "elementary school" refers to the first six grades but may include, depending on organization, the first seven or eight grades. The term "secondary school" refers to a school which includes any combination of grades seven through twelve. By this definition all junior high and high schools are secondary schools.

	Secondary	Elementary	Special Schools
Accredited:			
Public	358	605	22*
Nonpublic	31	48	
Total Accredited	**389**	**653**	**22***

Reporting for accreditation is done on a prescribed organizational pattern. Frequently a school that includes grades 1 - 12 will report to the accrediting agency as three separate organizations: grades 1 - 6, 7 - 9 and 10 - 12. Consequently, the number of schools accredited is always at variance with the total number of schools in other tables.

*Special schools are those which serve exceptional children.

Note: The dropouts on this page represent the number of dropouts in a given year as a percent of the enrollment. Many of these children return to school the next year and possibly dropped out again the next year. Pages 35 & 36 should be studied to get the true picture of the number of pupils who start school in grade one and stay in school to graduate. Page 36 shows the number of fifth graders who remained in school and entered the twelfth grade seven years later.
